

Visage® RIS

Streamline and Integrate Your Radiology Workflow

One Solution. One Product.

- Appointment Scheduling
- On-line exam screening forms
- Patient Record Management
- Comprehensive Insurance Management, including Pre-Certification Mammography & ICD-9 Coding, CPT Management
- Mammography Tracking (MQSA/Bi-RadsAtlas Support)
- Patient Registration
- Integrated Document Management
- Technologist Worklist Management
- Radiologist Worklist Management
- Fully integrated with Visage® CS
- Single Desktop Integration to PACS/Reporting
- Transcriptionist Templates
- Electronic Report Generation and Signature
- Automated Fax Report Distribution
- Fully HL7 and DICOM compliant, with flexible integration engines Extensive Practice Reporting Tools; ODBC, OLAP & SAP Outputs
- IHE Supportive
- Comprehensive Billing Solution
- HIPAA Supportive Security and Audit Trail

Streamline and Integrate Radiology Workflow

Combined with PACS and Reporting, the benefits of integrated workflow will further enhance your productivity: reducing report turnaround time, increasing staff productivity, eliminating the need for redundant data entry, removing broken interface issues, improving the quality of claims and speeding insurance payments and simplifying the practice analysis data reporting process. An integrated RIS/PACS/Reporting solution streamlines and integrates each critical phase of information, image and voice management workflow.

RIS Server

A single RIS server supports the RIS application and all faxing, scanned documents and interface software. Scalable and powerful, the RIS can support multi-site, multi-modality practices with optimal performance and minimal network and bandwidth requirements.

Integration Services

Visage RIS uses native HL7 and DICOM interface engines to integrate with external systems or modalities. Visage works with each vendor to customize specific integration requirements, develop, test and deploy the optimal interface at your site.

Visage RIS provides DICOM Modality Worklist and Modality Performed Procedure Step.

Implementation Process

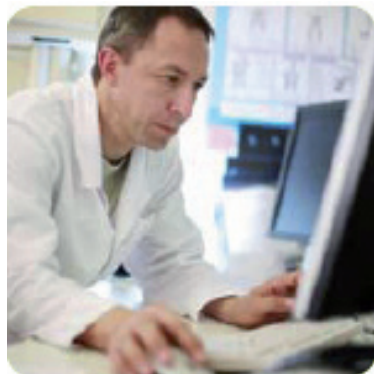

With Visage Services, you can take the first step toward digital confidence. Our comprehensive workflow analysis and implementation process allows for a smooth transition by reviewing your current and desired workflow process, looking for ways to increase efficiencies and reduce manual/paper transactions. Whether transitioning from analog to digital or converting your existing RIS data, Visage reviews every step in the process so you know what to expect.

Our role-based, train-the-trainer programs help your staff transition to your new system.

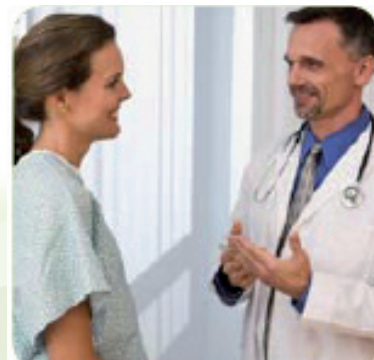

Support

With our superior global 24 x 7 support coverage the Visage support organization will focus on resolving your issues promptly on your first call.
